Sass

Gulp/Webpack

Git

Wordpress

Adobe Creative Suite

Interactive Developer || GSW NY || 06/17 - Present

My role in pharmaceutical advertising demands quality products within fast timelines and strict regulatory limitations.

- Built and maintain websites in Angular 5, Wordpress, and various technologies
- Developed a custom framework for a feed of user posts and admin dashboard
- Spearheaded research and implementation of Salesforce Marketing Cloud platform. Presented techniques and findings to clients and sister agencies
- Maintain and update Angular 5 touch panels
- Spoke at Agile meetings for the development team, assist in scoping timelines, and manage development resources
- Created Dev & Tell, a weekly session for developers of all levels to share processes, tech, and tricks
- Developed a touch panel data visualization of Parkinson's patient profiles

Freelance & Personal

- **Ballpark Weather** - React SPA that uses real time weather data to indicate games in danger of being delayed - [link](#)
- **Transways Motor** - Small business website with custom design built in wordpress - [link](#)
